### BalconyDrain

#### Private House - Hawthorn, Melbourne, VIC

Shakespeare Grove is located in Hawthorn, 6km east of Melbourne's CBD. Hawthorn is regarded as one of Melbourne's most affluent and prestigious suburbs, featuring many multi-million dollar houses.

#### Project Design Brief

The external building areas, specifically around the swimming pool and along the building's balcony areas, required a new stormwater drainage system. The owner expressed a strong preference for a visually discrete system that would blend in with the various floor finishes. The designer and builder had to collaborate with the drain manufacturer to build a custom drain that would meet both the performance and aesthetic requirements of the project.

#### ACO Solution

- **BalconyDrain** with custom tile insert

#### Benefits

- Custom-made stainless steel V-shaped channel aids water flow to the outlets to minimise standing water in the channel
- Custom-made stainless steel tile insert to seamlessly blend with the large terrazzo tiles

#### Other ACO Products Used

- Bathroom drainage channels (QuARTz by ACO)

PF2019-19B
